1. A card numbered 1–6 is chosen and a fair die is rolled. Find the probability that the sum is a multiple of 3. $12/36$

2. Two coins are tossed and a number from 1–4 is selected. Find the probability that the number is greater than the number of tails. $1/8$

3. A spinner with numbers 1–8 is spun and a die is rolled. Find the probability that the sum is prime. $20/48$

4. A card numbered 1–5 is chosen and a coin is tossed twice. Find the probability that the card number is equal to the number of heads. $3/20$

5. Two dice are rolled and a card numbered 1–3 is chosen. Find the probability that the total sum is even. $54/108$

6. A number is selected from 1–10 and a die is rolled. Find the probability that the product is divisible by 4. $19/60$

7. A spinner labeled 1–4 is spun twice. Find the probability that the two numbers are different. $12/16$

8. A card numbered 1–7 is chosen and two coins are tossed. Find the probability that the card number is odd and at least one head occurs. $15/28$

9. Two dice are rolled. Find the probability that the sum is a perfect square. $7/36$

10. A number is selected from 1–9 and a die is rolled. Find the probability that the sum is greater than 10. $15/54$
