# Approximating Irrational Numbers (Part 2)

Choose the correct option

1. The value of  $\sqrt{145}$  to 3 decimal places is:

- ☐ (A) 12.042      ☐ (B) 12.041      ☐ (C) 12.043

2. Which is closest to  $\sqrt{0.07}$ ?

- ☐ (A) 0.264      ☐ (B) 0.265      ☐ (C) 0.266

3.  $\sqrt{289.5}$  lies between:

- ☒ (A) 17 and 18      ☐ (B) 16 and 17      ☐ (C) 18 and 19

4. The best estimate of  $\sqrt{225.25}$  is:

- ☒ (A) 15.01      ☐ (B) 15.02      ☐ (C) 15.00

5. If a square has an area of  $338 \text{ m}^2$ , the side length to 2 decimal places is:

- ☐ (A) 18.39      ☐ (B) 18.38      ☐ (C) 18.40

6.  $\sqrt{8.3}$  is approximately:

- ☐ (A) 2.879      ☐ (B) 2.880      ☒ (C) 2.881

7. The value of  $\sqrt{180}$  to 2 decimal places is:

- ☐ (A) 13.42      ☐ (B) 13.41      ☐ (C) 13.43

8.  $\sqrt{0.005}$  is approximately:

- ☐ (A) 0.071      ☐ (B) 0.070      ☐ (C) 0.072
